

Parish Meeting Village Hall Report for 2024/25

2024 was another year of change for the village hall.

Improvements were made to the hall with new lighting installed throughout the building, both inside and out; new plumbing in the kitchen and toilets; the floor was renewed and the main hall decorated. All chairs have been cleaned and refreshed and new hand driers installed in the toilets.

More work is planned for the floor and stage through the May half term, and the stage curtains will be cleaned during the summer school break.

The new committee were keen to ensure the hall met modern standards and was given a fresh look for what is hoped will be a new generation of users.

A change was made to the hourly rate charged for the hall's use, with one standard rate throughout the year rather than a summer/winter rate as before.

Once again we have been able to accommodate the school for week day activities throughout the year, and the hall is in regular use for Pilates, Ballroom Dance Classes, and Parish Council meetings. This year, the church has also used the hall for regular monthly after school activities.

A number of villagers have used the hall for a variety of private functions and the committee hope that more will see the "new look" hall as a possible venue for more private activities and functions in the future.

We are in the process developing our own website and will be seeking a link to that from the parish council website in due course.
